Benefits for the Consumer Role

Making equipment management simple and intuitive helps making the equipment process understandable and transparent to the employees plus saving their time for more important tasks. The benefits for the employees of using the equipment shop can be grouped in three main categories:

Time savers & Convenience

- Simple, intuitive and state of the art order processes
- Ordering assistants dramatically reduce searching for appropriate equipment
- Mobile Equipment Management from anywhere
- No more calls, faxes or excel exchange with suppliers or internal support
 - Returns and maintenance processes fully digitalized
 - Online access over fulfillment status of open orders
- Self- or Key-User Ordering

Maximum Personal Protection

- Article Lifecycle Tracking provides detailed information on equipment items
- Insurance for personal protective equipment is up-to-date and functional
- Personalized communication channel for updates

Personal data aspects

- Full transparency over personal equipment and history
- Only data fractions required for fulfillment are forwarded to suppliers

Benefits for companies

Although there are already many benefits of the end-users, there is even more benefits for companies:

Digitalization

- Full supply chain digitalization and integration with partners at no extra cost
