

# INSTALLATION: ADM catalogs installation notes

Catalog does not work checklist:

- ADM do not write log when catalog is subscribed
  - Check: if following components are installed:
    - WIN ADM
      - Take care that ServiceDescriptor file exist in root folder od ADM because the Publisher do not do it.
    - bop.catalogs API
      - Check that in appsettings.json these settings are correct because the Publisher do not set them:
        - "UpdateComponentURL": "http://10.98.138.30/zugseil-adm"
        - "ElasticSearchUrl": "http://10.98.138.40:9200/"
    - bop.CSI API
      - Check that in appsettings.json these settings are correct because the Publisher do not set them:
        - "UpdateComponentURL": "http://10.98.138.30/zugseil-adm"
        - "ElasticSearchUrl": "http://10.98.138.40:9200/"

Catalog Management does not work cheklist:

- Check if following componentes are up to date
  - zugseil-ces-assortment-api
  - zugseil-ces-classifications-api
  - bop-cta-api
