

Inventory Management Functionality

Inventory structure management

This part of inventory management is about managing the structure of the warehouses. It is mostly done once and then is stable for a long time.

- [Warehouse administration](#) - Maintaining a list of warehouses
- [Warehouse area administration](#) - Each warehouse bears areas, which drive the operation mode

Inventory content & value management

- [Stocktaking](#) - Use this app to perform stocktaking jobs. Core functionalities are
 - [regular stocktaking](#)
 - [rolling stocktaking](#)
 - [Adhoc stocktaking](#) and [Inventory revaluation](#)
 - Value reporting
- [Stock defragmentation](#) - this app is used to defragment a warehouse area and free up free space
