

Production order

When a production order was placed, it has to undergo these steps:

- Checking for acceptance
- [Production planning](#) - This means blocking resources (material, HR, machine capacity) for this production order
- Production - This means production floor tracking and production
- Production Quality Control checking - This means confirmation of the quality of the products
- Taking into stock

Related articles

- [Fulfillment](#) - Production of items demanded by the organization is one possible way of internal demand fulfillment. Also production required materials, which have to become fulfilled for production to take place.
