Purchase order billing address is taken from accounting area

Requirement

When [ZUGSEIL Shop](#) is used by organizations as internal procurement platform, the billing address should be taken from the SAP accounting area (BUKR).

Solution

- The accounting area administration has to include default billing addresses
- In shopping purposes, there are two settings:
 - Do allow entry of billing address (Yes/No). In this usecase, it should be set to "**No**"
 - Override billing address by accounting area of cost center (Yes/No). In this usecase, it should be set to "**Yes**"
- The shop needs to obey these two settings and take the default address of the accounting area, if the settings are defined as above.
