

# Rapid demand entry tools

- [Fast ordering assistant](#) - Provides an optimized keybased entry process for the users. Less clicking - more typing
- [Listbased ordering assistant](#) - User can create shopping lists, which can be triggered when required. This is a massive time saver when it comes to repetitive procurement tasks
- [Bulk Team Equipment Ordering Assistant \(TEA\)](#) - this allows to rapidly order equipment items for a group of staff members. This can be a very cumbersome process, if you have to order for each employee, e.g. because each team member requires its own variant/size.
