## **Status-Meeting Responsive 19.08.**

### **Frontend Components**

zugseil.products.administration Version  
**6.0.73** Master  
 Zugseil Shop APP **4.3.27** Master  
 zugseil-order-overview 1.1.6 Master

### **Backend Components**

EBusinessCacheService => 7.3.12 master  
 \*NOTE: Delete products cache file before installing.  
 rm /var/bop/EBusinessCache/Assortment/Products\_\*  
 zugseil.ordersoverview.api - 6.1.21 - master  
 bop.clearanceprocess.agent - 7.7.38 - master  
 Tenant Updater - v6.003.061 - master  
 DB update

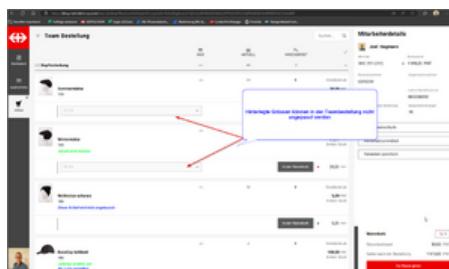

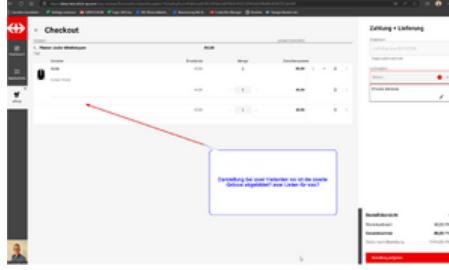

1. There are image place holder which do not displays an image.
2. Extend orders overview filter by product name, number and product variant
3. opening order details takes too long: separate methods for positions, histories and approvals

## **Feedback from 05.08.-15.08.**

<b>No.</b>	<b>Date</b>	<b>Application name</b>	<b>Flaw</b>	<b>Status</b>	<b>Comment</b>
------------	-------------	-------------------------	-------------	---------------	----------------

		After manual point run, the account balance is wrong: In the overview and also in details the user should have an account balance (1) of 890 points, but it's shown with the old saldo of 565 pts. Also the increasing on the account (2) would be wrong, cause it is 325.		done	Rene will check with Alex MPR, waiting for feedback
1	08.08. Shop				

## Funktionstest auf Test / finales Feedback 18.07.

No.	Application name	Flaw	Status	Comment	
1	Shop - Team order (EMA)	Added sizes cannot be changed		done	Shopping purpose right dependant: Selecting a non-default variant is enabled
2	Shop - Team order (EMA)	Product was fragmented, since SBB does not need it, it should be SP right dependant		done	It will not be right dependant but the logic is that if $qty > 1$ AND there is at least one "option per position" enabled in SP, then the fragment icon (as well as "... icon for options) will be displayed. The same logic applies to products with or without variants

3 Team order widget  
User Joël Hagmann (U243259) has an error on team order widget

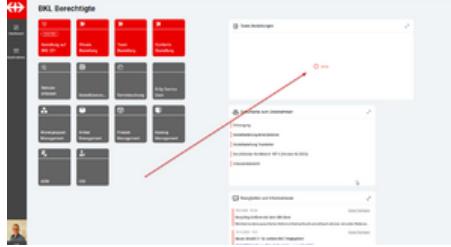

4 Personal order -EMA  
On the checkout quantity cannot change

5 Personal order -EMA  
Quantity stepper cannot return to 0, only on the delete icon

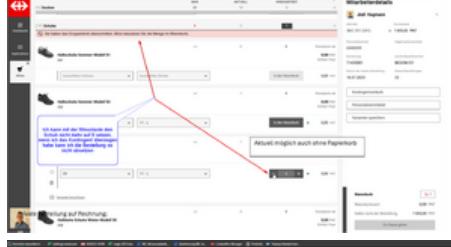

6 Private order  
Characteristics not readable, expend the text + mouseover

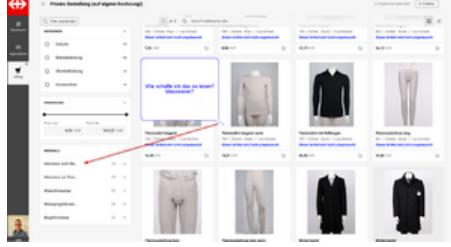

7  
30.07. There are image place holder which do not displays an image. That does not make sense. If there is at least a default image for the product but no dimension- or variant specific image, the default image must be displayed in all image placeholders.  
added to task 814

8 Shop  
Where is the delivery option

  
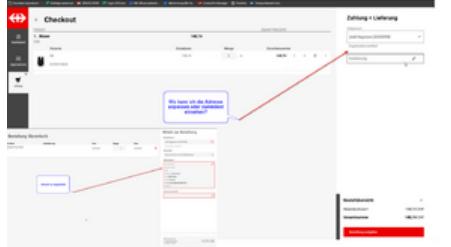

done

  
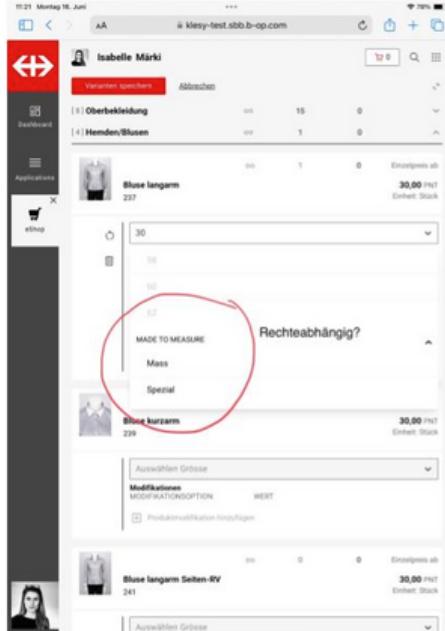

done as explained in the meeting, in EMA quantity in the checkout cannot be changed because of the quantity limits

  
done when reducing quantities from N to 1, if going below 1, the button will be returned to state "Add to cart" and the item will be removed from cart

  
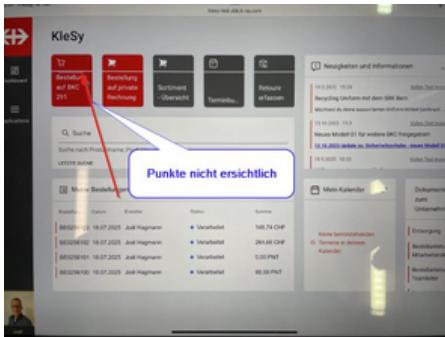

done

  
done

  
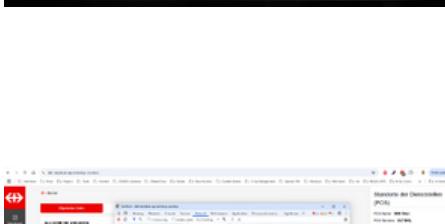

done Delivery option was deleted from SP

9 EMA Made to measure variants 

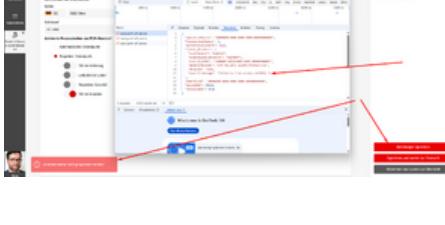

done ADM right dependant: Can order 'Made-to-measure' products

11 Activity entitlement widget Points are not displayed in the entitlement widget  
Tested on yoga lenovo laptop 

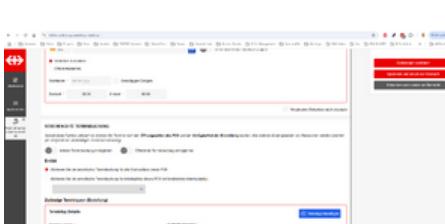

done

12 EMA Title moves up when scroll (tablet)  
30.07. It is still not possible to save a service point as long Austrian country is not enabled for the administration digital. Austrian country should not be mandatory to save a POS 

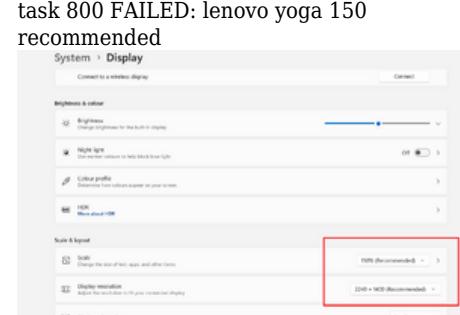

done

13 Point of service administration  
30.07. If I add workplaces to a service point of type fitting location, then it is not possible to scroll the page on tab opening hours. 

done

14 Point of service administration  
30.07. If I add workplaces to a service point of type fitting location, then it is not possible to scroll the page on tab opening hours. 

done

testable installation components added to task 800 FAILED: lenovo yoga 150 recommended 

done

design agreed, because of the space, desktop works the same

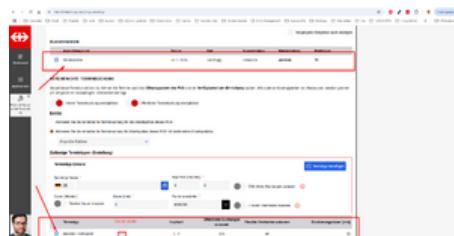

The case happened only via remote session to the office pc. Because FE cannot calculate the screen size correctly.

30.07.

1. Once a closing time is added it cannot be changed afterwards. Imagine the user forgot to add a translation. The closing time must be deleted and created new.

2. Same for the appointment types. Once it is created, it cannot be changed anymore. You don't know which color code was used and if you forgot to add translation you cannot change it. Deleting an appointment type would have a massive impact of the calendar view and made appointments. So deletion of a type is a no go as long appointments made in the calendar.

15 Point of service administration

In both cases we need the possibility of an edit functionality. The color code and color of an added appointment types must be visible.

## 30.06. Returns and appointment booking

### Frontend Components

FE Appointments manager MR 1.3.62

Order-overview-app 1.1.0 MR

Zugseil>Returns-Management MR 2.0.33

### Backend Components

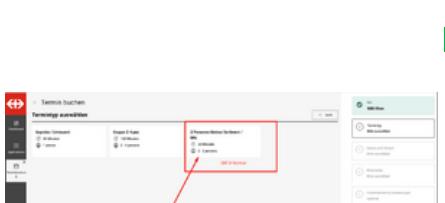

No. Application name

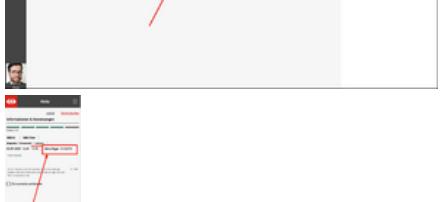

Flaw

Status

Comment

1 Appointment Translations missing on manager DE, EN, IT   done

2 Appointment manager Internal types made in BKL should not be visible in KleSy, it is only visible to BKL employees  done

3 Appointment manager Mobile view: When there is 1 person appointment, in the last screen user's name is displayed, but when there is group appointment it is not, names should be visible in the last screen.   done

4 Appointment manager Uploaded documents should be displayed in the screen where appointment is successfully booked  done

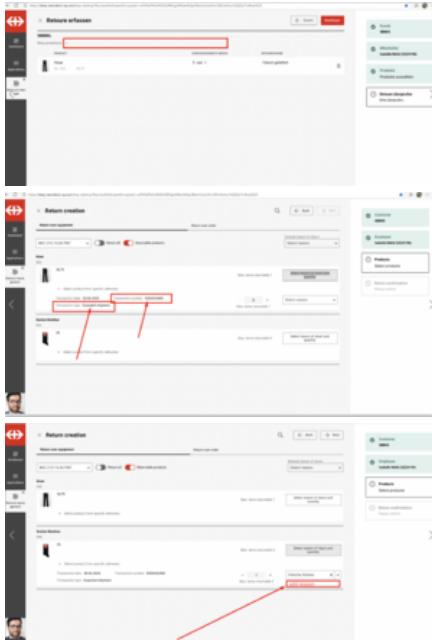

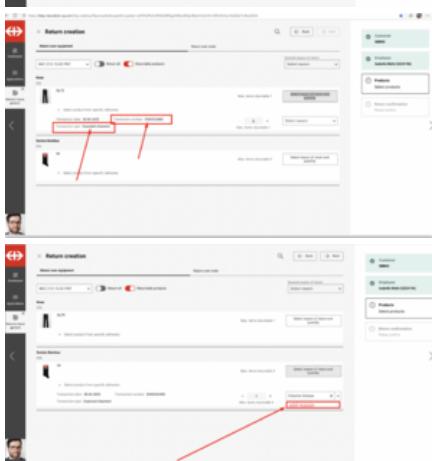

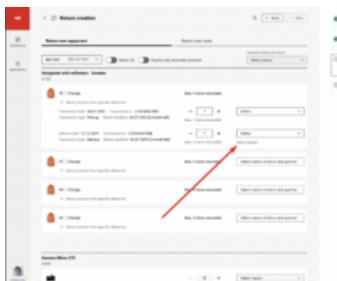

5 Appointment manager Uploaded document should be displayed in the calendar as well: day and week view  done

6 Appointment manager Default country in system settings is Switzerland, here for every user Germany is preselected, it should be Switzerland.  done

7 Appointment manager Display employees business default Email and business default phone number and employees activity like for the manually added user  done

8 Appointment manager Radio button "Show only available slots" should be switched on by default  done

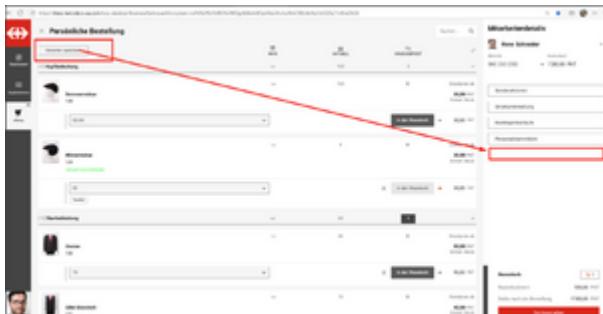

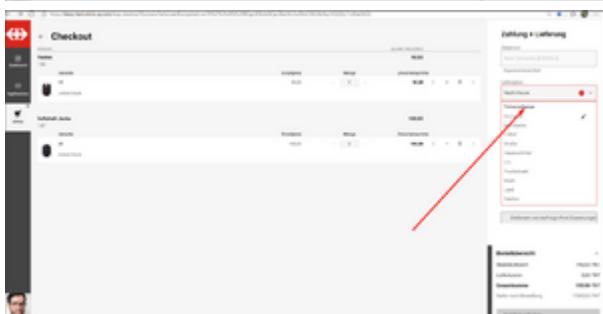

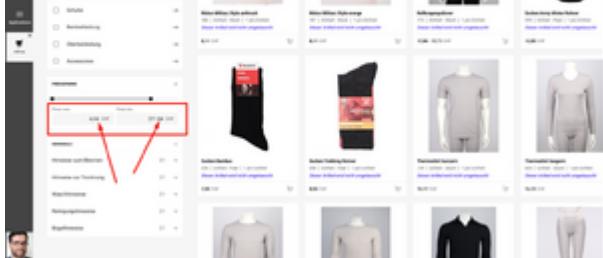

9 Appointment manager In the info tooltip in the day view and week view, days and month are not translated. DE, FR, IT  done

	Tablet view: Team appointment(teamleader right) - Instead of	
10	Appointment manager	done
11	Appointment manager	done
12	Return manager	done
13	Return manager	done
14	Return manager	<p>In the confirmation screen return address is not displayed, should be suppliers address displayed</p> 
15	Return manager	<p>For transaction type and transaction number shipment and shipment number should be displayed, instead of expected shipment</p>  <p><b>Note:</b> we cannot put as a transaction type something that is not (shipment), this would collide with other processes which use "transaction type". But we can put ShipmentNumber_(ExpectedShipment)</p>
16	Return manager	<p>"Add reason" is missing on the return over entitlement, when return quantity is more then 1, in order to assign different return reasons</p> 
17	Return manager	<p>Not possible to return over order, quantity cannot be added, reason as well, after a while message pops up that app is not responding</p>

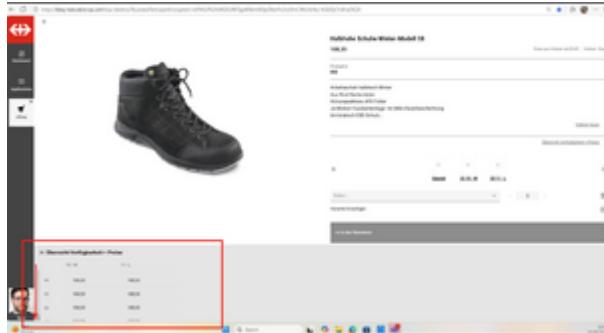

# 24.06

## Frontend Components      Backend Components

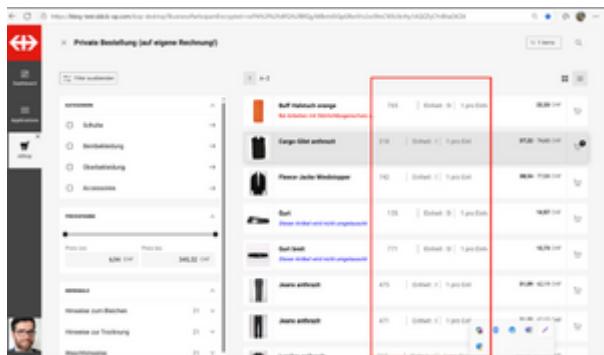

FE Zugseil shop version **4.3.12** API zugseil shop **8.2.25**

No.	Flaw	Status	Comment
1	Regular order (Kontierte Bestellung) order cannot be placed	<input type="checkbox"/>	
2	Private order cannot be placed	<input type="checkbox"/>	
3	"Save variants without ordering" replace in the sidebar below the action buttons	<input type="checkbox"/>	
4	Display modification scissors only if modification is preconfigured, if not it is confusing.	<input type="checkbox"/>	
5	In Desktop version expand users info by default, there is enough space	<input type="checkbox"/>	
6	If there is one delivery option in the checkout, don't allow user to re-select, when click on same delivery option again, address will be empty	<input type="checkbox"/>	
7	Price filter always displays decimals random when activating the filter	<input type="checkbox"/>	

- 8 Overview availability and prices table is not fully visible, last two variants not possible to scroll

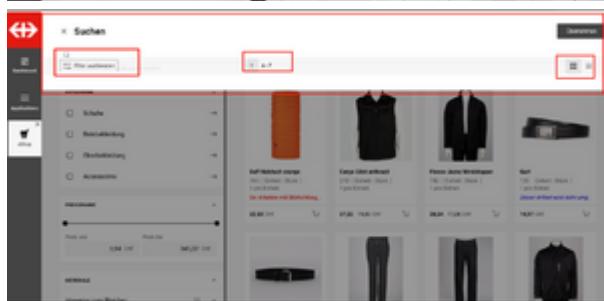

9 On small laptop  
(lenovo yoga and  
tablet), list view is not  
in order

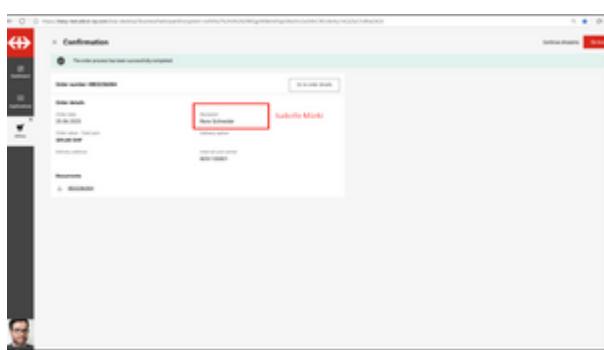

When search component opens, others like sorting, filter should not be visible

10

Regular  
order(Kontierte  
Bestellung): in the  
checkout, target  
person is changed into  
Isabelle Märki and  
order is placed for her,  
but in the confirmation  
screen it is displayed  
name of logged in user  
(012) in Orders order  
is displayed for Rene

done, with  
static  
search  
component

12 Order placed, because of delivery cost user went to minus, it should not be possible

user can be able to place on order even though there are not enough points - based on permission. please check if that is the case and elaborate. PS: as seen in picture, order goes fully on minus, not only because of delivery costs.

## 13.06.
