TEST-Plattform

Create Digital on TEST-Plattform - using test01.zugseil.com as example

1. Call ZUGSEIL-Website: <https://test01.zugseil.com/zugseil-website>
2. Click Register
3. Enter Details for your digital with a valid email address

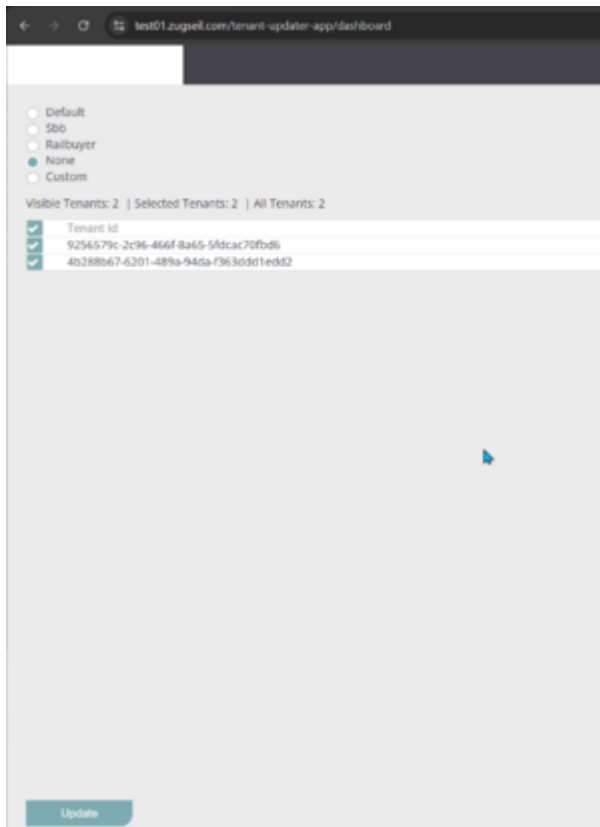

4. You end up with a blank path with one json line (s.a. Image)
5. Copy that line behind url and add the current domain in front of it, like so:
<https://test01.zugseil.com/zugseil-website/Registration/PrepareUserData>
6. Put in Browser Address line and Enter
7. You landed on: "Org-Units". Continue with additional details.
8. You landed on: "Cost-Centers". Continue with additional details.
9. You landed on: "Administrator Account". Finish registration
10. You are done (or so it seems)

Find Login-Details

1. Login to Windows Server
2. Open latest logfile of module zugseil-website, e.g.: c:\inetpub\logs\zugseil-website\15.12.2025.log
3. Skip to last lines. You'll find your login-name ("Registering dennis.huesemann@zugseil.com"), TenantID and password ("generatedPassword: 1234_xXxXxX")

Distribute Module Rights

1. Login to Tenant-Updater: <https://test01.zugseil.com/tenant-updater-app>
2. Use the login-name and password (s.above) to login

3. Check every Digital (possibly just the newly created Digital) and click "Update" - see also:
4. Wait until Process has finished

Finally! Login

1. Navigate to <https://test01.zugseil.com>
2. Use your access details (s. above)
3. Login, be frugal and improve
