

# ZUGSEIL ELEVATE

ZUGSEIL elevates other systems into the inter-company digitalization domain. ZUGSEIL ELEVATE integrates seamlessly into existing IT landscapes with existing ERPs, HR, PIM or other systems. It consists of these services, which offer process integration with the it landscape:

- [ZUGSEIL P2P Hub](#) - Typically binds to ERP and PIM systems
- [B-Op HR Hub](#) - Binds to HR systems
- [B-Op FI Hub](#) - Binds to Finance systems
- [Infrastructure: Bridge-Setup](#) - Allows to build hybrid solutions, where the digital resides outside of the intranet, but the core systems stay in the customer's intranet.

For other all other integrations, which go beyond the standard products, there exists an open API, which bases directly on the b-op datamodel. You can read up in [this article](#) how to gain low level access through the [B-Op API](#).
