

ZUGSEIL Shop - Extensibility

Procurement core process extensions

ZUGSEIL Shop comes with extension packages which add sophisticated procurement functionality towards guided buying functionality. These extension packages exist for the ZUGSEIL Shop:

- [ZUGSEIL EMMA](#) - enhances a sophisticated toolset to accelerate the buying processes and reduce false decisions. This extension of the regular shop allows to enforce company regulations for ordering products predefined to certain target audiences within the company. Available products can be defined on user level - or be linked to team memberships, group memberships, organizational unit memberships, skills, job profile or rank.
- [ZUGSEIL TILA](#) - delivers a point of service functionality with the ability to replace the necessity for physical staff shops. It enriches the ZUGSEIL Shop with assistants, which guide and govern the ordering party through the ordering process for personal equipment.
- [ZUGSEIL CATIE](#) - This extension brings transparency of procurement structures of large organizations to internal users. Find responsible buyers, contracts or suppliers for any kind of product easily and create a Procurement Requisition easily without first having the hassle of finding out the right procurement path or procurement officer.

Other products boosting functionality of ZUGSEIL Shop

- [ZUGSEIL TILA - Body data capturing and management](#). Detecting the appropriate sizes is an art - and the job of tailor inside a shop. With our [AI based body measure capturing](#) tools we deliver this functionality by a mobile assistant to every user. This feature can save a lot of time as traveling to Point-Of-Services is no longer necessary for users within the normal size ranges.
- ZUGSEIL Conf-IDE (CONFIDE) - allows the user to configure their own product.
- [ZUGSEIL CIRA](#) - integrating procurement and asset management into one solution with no interfaces required. Procured assets are bound to the business object they are destined for. Once they arrive and are commissioned, they can be tracked over their entire lifecycle no matter if they change primary user or are re-attached to other common business objects, like staff members, projects, offices, workplaces, ... and many more.
