ZUGSEIL Shop - Integrated Knowledge Management

The resource which can save you the most money is your knowledge and experience. We have found ways for getting the knowledge of your departments and related procurement organization parts into the software.

Examples:

- Who can procure which items?
- How does workplace correlate with equipment?
- How does job profiles correlate with equipment?
- Automation of procurement decisions in multi supplier environments?
- Who to contact in the procurement organization to procure a type of product?
- ...

If you dont have that knowledge (any more), many of our extensions use AI to support you to re-gather the knowledge again.
