

ZUGSEIL Shop - Release History

This shows the release history of the [App:ZUGSEIL Shop](#). The shop is a service bundle consisting of 2 services:

- [Shop Frontend](#) - The visible frontend application
- [Shop API](#) - This is the backend service, which is made specifically for the shop

Please note, that the api depends more and more on Shared Logic Hub services, which offer realm-wide b-op standard services. SLH are always backwards compatible, so please try to update to the most current version, when deploying the shop. Dependencies are on the:

- Checkaccount SLH - Used by the shop for validation of cost controlling elements
- Catalog SLH - Used by the shop for fundamental caching of catalogs usable by the shop. Based on this the Shop-API builds user session specific caches
- Entitlement SLH - Used by the shop for retrieving, manipulating and querying entitlements of entitled persons
- InternalOrder SLH - Used by the shop for placing an internal order in local and remote cases
- ProcurementOrder SLH - Used by the shop for placing a procurement order in local and remote cases

For current versions please look up the b-op [SLH page](#).

API

-

Change-List

Display delivery costs on the Account history

V3.10

Release 3.3, Build 39 scheduled for 21.11.

Frontend

zugseil shop APP 4.1.333
DEV-580

Backend

zugseil shop.api 8.1.3

Change-List

The new version has a problems to process an order.

Points restriction message must be visible in mobile version as well

Address new rule should be:

- Prio 1: take the field value directly from the default value in the address configuraton - if empty
- Prio 2: take the address field company 1 data from the office address company 1 field - if empty
- Prio 3: take the value from the tenant business participant name.

Costcenter dropdown - order sequence not ok. All lists doesn't matter if cost center or office must be sorted A-Z 0-9 and the display format must be taken from cultur settings

In case a new user is created and is using the shop the first time and in shopping purpose only one delivery option is available (so in that case this one is the default delevery option), the delivery option is not preselected in the checkout screen.

If a delivery option is used which uses no shipment path (so no delivery costs), the delivery cost section in shop should not be displayed.

The current quantity must be incremented immediatelly after the order was created. Is is not working atm.

V3.09

Release 3.3, Build 38

Desktop Dev-579

Frontend

app synapse desktop V.4.5.33 test branch

API

api synapse
desktop v5.015.005

Change-List

The opened application must be changed, that it fits more in the desktop design

After selecting a language the menu must be hidden again

Logout option is missing in new desktop

When Session expired the desktop must in form the user like the previous desktop version

On save the dashboard stays open and there is the possibility to close the settings of the current dashboard.

When an application ist marked as hidden on dashboard, and the "order" menu is opened and saved then the application marked as hidden are removed

When desktop settings are opened, Dashboard be the default page

Log in for desktop settings

Dropdown for shopping purposes

Placeholder to allow spacing on dashnoard
